RĪGŌ

Vilniaus m., Justiniškės, Rygos g.

realu

Projekto duomenys

Objekto tipas Butas

Būklė Statomas

Aukštų skaičius 9

Konstrukcija Monolitas

Įrengimas Dalinė apdaila

Plotas m² 26 – 76

Statybų metai 2026Q2

Kambarių skaičius 1 – 4

Energetinė klasė A+

Šildymas Centrinis-kolektorinis

Apie projektą

Discover your new home in the Justiniškės district of Vilnius, where the modern residential complex **RĪGŌ** will rise. This project offers contemporary apartments designed to take your quality of life to the next level! Here you will find 1-, 2-, 3-, and 4-room apartments ranging from 27 to 77 sq. m, tailored to meet all lifestyle needs.

All RĪGŌ apartments will feature floor-to-ceiling panoramic windows, ensuring abundant natural light and a strong sense of space. All buildings will be equipped with elevators, while the apartments will include central underfloor heating, heat recovery ventilation systems, and air conditioning to ensure comfort throughout the year. The complex will also feature a children's playground, walking paths, and landscaped green areas, creating a cozy and pleasant environment.

The project is located in the very heart of Justiniškės, offering excellent connectivity and well-developed infrastructure—wide Ryga Street, schools, kindergartens, shopping centers, and healthcare facilities are all nearby. Construction completion is planned for the second quarter of 2026.

RĪGŌ Standard

We have created the RĪGŌ standard to meet the key needs of new homeowners before moving into their new residence. Below are the main criteria of the RĪGŌ standard.

Partial Finish

In our project, a partial finish means preparing the apartment so that the buyer—or their designer—can implement their vision from the very first day of purchase.

All structural and partition wall contours are prepared for plastering; all engineering systems—water supply, electricity, heating, sewage, ventilation, and cooling—are fully installed, operational, and tested. Exterior finishes, stairwells, landscaping works, parking spaces, and other infrastructure will be fully completed and ready for use.

Security

The safety of the project's common areas and premises will be ensured by installed security cameras. Apartments will be equipped with fire alarm systems and intercoms for door access control.

Environment

The project area will be adapted to residents' needs. Green zones will be landscaped, convenient walking paths laid out, and benches and lighting installed alongside them. A modern, separate play area will be created for children. A parking lot will ensure safe and secure parking for residents' vehicles.
